

PROGRAM:-

```
#include<stdio.h>
int main()
{
    int rey,mon,par;

    printf("Enter the cost of three watches :");
    scanf("%d %d %d",&rey,&mon,&par);

    if(rey>mon && rey>par)
    {
        printf("Reynolds is costlier than other ");
    }
    else if(mon>rey && mon>par)
    {
        printf("Montex is costlier than other ");
    }
    else
    {
        printf("Parker is costlier than other ");
    }
}
```

//Output 1 :-

```
Enter the cost of three watches :97974
2256
2329
Reynolds is costlier than other
-----
```

//Output 2 :-

```
Enter the cost of three watches :48462
85464
41854
Montex is costlier than other
-----
```

//Output 3 :-

```
Enter the cost of three watches :3250
1563
58425
Parker is costlier than other
-----
```
