

MR. Rao is an employee, write a c program to calculate gross salary and net salary from the input basic salary , allowances and deductions.

PROGRAM:-

```
#include<stdio.h>
int main() {
    float basic, allowances, deductions, gross, net;

    printf("Enter Basic Salary: ");
    scanf("%f", &basic);

    printf("Enter Allowances: ");
    scanf("%f", &allowances);

    printf("Enter Deductions: ");
    scanf("%f", &deductions);

    gross = basic + allowances;
    net = gross - deductions;

    printf("Gross Salary: %.2f\n", gross);
    printf("Net Salary: %.2f\n", net);
}
```

```
C:\vishnu\10.exe
Enter Basic Salary: 100000
Enter Allowances: 75000
Enter Deductions: 10000
Gross Salary: 175000.00
Net Salary: 165000.00
-----
Process exited after 54.73 seconds with return value 22
Press any key to continue . . .
